About This Game

In City Defense you need to protect your city from capture by enemy equipment.

To do this, you can build 3 types of automatic turrets, which have their own unique characteristics and use different ways to destroy the enemy. But do not forget to upgrade your turrets, then they will cause more damage and continue to shoot!

Fierce battles take place in 15 unique locations, ranging from urban areas to spacious suburbs. Many game elements, including enemy routes, are randomly generated and give a unique experience from each game.

Earn money by destroying enemies. They can buy the unwinding time to build new turrets or to upgrade old ones. Careful study of the features of locations and types of enemies will teach on the move to make the right decisions.

Peculiar properties:

- "Rewind" time ago! But it only works on enemies, and you will have time to destroy them!
- Create unique turrets to defend your city!
- Different levels of difficulty
- 22 types of enemy vehicles with their unique characteristics

『那些演员格外看重自己的面具。

在开始登台之前，他们会小心地把面具从木盒里“请”出，让它正对着自己的脸。

“我要来演你了。”——他们会郑重地向面具说出这句话。』

他少见地挥舞双手，侃侃而谈，似乎非常喜欢这个话题。

『抛弃自己，完全继承角色的意志，代它实现所思所想……

很值得尊敬的职业精神，不是吗？』

65 special costumes which add cute to the feel. Worth the buy. Feel like the game is a bit unbalanced atm, exploding troops are pretty overpowered in multiplayer deathmatches. Unless you are able to CC them there is little chance to kill a sapper or a sneak before they decimate you IMO. Still a lot of potential here even if some concepts and mechanics seem a bit obtuse initially. Looking forward to the future of what this game has to offer.. I love this game. While the graphics are not quite what most people enjoy these days, the storyline is amazing. The replayability of this game is unparalleled because you can do ANYTHING you want to do. There are repercussions for doing stupid things like killing a main character, but the game will let you do it if you're strong enough. As long as you're strong enough and spend your skill points wisely, you can go to any area of the game you want. It's a game that requires a little strategical thought, and a whole lot of patience.. I felt like physics were inconsistent in some levels which makes you frustrate.

Art is nice, the puzzles themselves are challenging, music is pretty much same all levels, mostly environment sounds. I would say give it a shot.

. I'll add this review here but I've updated the main game page with a combined review.

The Eagle King adds several welcome features to the game, mainly a PoM style campaign from Hegemony: Gold to this installment. You follow Epirus in his exploits throughout Italy, performing tasks that are in line with what happened historically BUT it doesn't stop there. Should you decide you can conquer all off Italy and establish a new Greek Hegemony in the region.

Upsides are the historical tidbits, added units based off of the mainland Greeks and a totally reworked naval system.

In addition to the campaign there is an invader scenario which gives you control of up to 7 additional factions that come from outside the Italy map.

You play as either the Senones, Boii, Dalmatae, Epirotes, Macedonians, Cretans, Mamertines and the Alelia. Each faction covers a culture, ie Sabellic, Etruscan, Gallic and they come with their own specific start like Naval Invasions or Cross Alp invasion.

In the invader sandbox you get your own tasks to ease settling into an assigned spot OR you can decide to screw it all and take the first city and begin your reign of terror.

Did I mention the smaller overhauls? The AI is much more competent and combines effective tactics, it actually uses navies and to great force and also intermixing mercenaries with its native forces to plug holes in their armies. Cities can be easily taken from you and the AI is a tonne more fun to play against.

Downsides are the diplomacy is still not where it could be and other aspects of ancient life like religion and trade are non-existent. There are still a couple of old bugs lurking around like units disappearing and disembarking units killing them immediately. Some units are not represented in an authentic way but I can respect artistic license.

All in all a good first step on expanding Heg:3 and I recommend it to anyone who enjoyed the base game!
. This is one of the best single player strategy games I've ever played.

I feel like it was reaching for a much more significant, thoughtful experience than it actually achieved.. Devastatingly brilliant.. While not being a perfect game, I believe that in my opinion, this is the best game in the series. I love the XP system, the towers, the maps, and the new additions, and how this game grew from the BTD4 Expansion.

This game features a new art-style not seen previously in the past 4 games, and it looks a lot cleaner, and smoother. The new Special Agents feature is much appreciated, as it added some great new towers whilst using the Monkey Money well, such as the Tribal Turtle, and the Monkey Farmer. These Special Agents can also be upgraded with the Pro-Mode, that involves you getting 50 of the same type of Special Agent.

Overall, this package of a 10 dollar game felt complete, with a new upgrade system for the monkeys, a ton of brand new maps, and even CO-OP mode and missions. This is a must buy for anyone looking to kill time, or just looking for a good time.. If you play this game... This is A Must item. Auto picks up tokens and saves you much time. afk more!!! if you pay anythings. buy this first. Warning!!! picking them up yourself and you cant go pee or poo without missing them because you to lazy or cheap and could not fork over a few more bucks and support the game.. Rubbish Game.

Beautiful vision.
