Graphics: 512 MB DirectX 10.1 Video Card (AMD Radeon HD5x00 Series / Nvidia GeForce 500 Series / Intel HD 4000 or

later)

DirectX: Version 10

Network: Broadband Internet connection

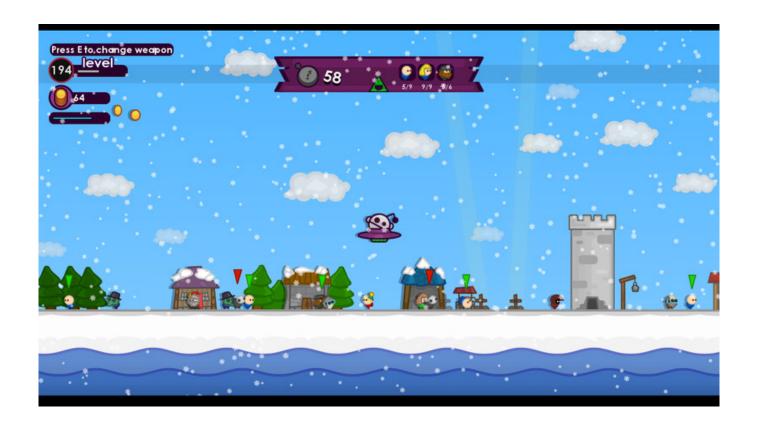

Storage: 12 GB available space

Sound Card: DirectX Compatible Sound Card

English, French, Russian, German

galactic civilizations iii - builders kit dlc

Nice gameplay, but poor visuals. Could perhaps use some ambient music.. A charming and relaxing Megaman-like. It's not very complicated or demanding, but fun and functions flawlessly.

As for the story... At the time of writing, I only finished three acts. Don't let the Storytellers handholding at the beginning upset you, he shuts up soon. The story likes to sometimes throw deep thoughts at you without warning. The protagonist often gives simple and boring responses, in particular to strangers and officials, but also proves eloquent and thoughtful when with friends and in her journal.

My point is: The game doesn't give you a taste of everything it has to offer right away, so be patient.. Nefer best girl 100/10

Anyways, the game as a visual novel is really good. The characters, the story, and so on. I see the game more as a personality test since you decide things based on what you would do (if you play it seriously) and that is what makes the game fun.

The tank building part could be improved. Other than that nothing else really.

I really hope that a sequel or a continuation is in the works. Play the game yourself and you'll understand why;). This is a good game to play with however there are few bugs that need to fix. Purchased this game without hesitation as I am capable of reading and understanding Japanese to certain level.

When I played it, all the text file shows up as random alphabet and boxes. I would not be complaining if it was at least in Japanese.. I dont give a piece of crap if theres no multiplayer...this game deserves a thumbs up for itys ahead-of-its-time gameplay and graphics and no nonsense campaign for single player....especially on sale. Drive tanks, humvees, helis, fly drones, snipe, do it all in any order you want.

Great game...no bugs.

\$5 on sale people.

cries... *commits suicide*

Gratuitous Tank Battles can be an incredibly fun and rewarding game. Remember the fun it was to build your own custom ships on games like Master of Orion? GTB is a tower defense game that's like that for every single unit or turret. From the smallest cheap gun to the big strongholds, from inexpensive recruit infantry to heavily shielded mechs.

Designing the units is simple, but the management of new and older designs can be a little busywork. But this kind of complexity that usually lacks on modern games is very welcomed.

The very fact that this games plays as both a traditional tower defense game and an inverted tower defense game is a testimony to its flexibility. It's a robust selection of units with great variation of strategies you can use to beat the enemy.

At least for me, the fact that you can design, customize and name every unit in the field adds to the enjoyment and creates a very fun experience when your guys are winning a battle. It's just most interesting when that tank unit you built to be fast and strong barely makes it to the finish line.

Building units is not everything, and the battles are intense and complex.

Apart from the built-in campaign, you can edit your own scenarios, and upload and download challenges from other users.

If you like Tower Defense games or games with customization, this is a very good choice. This game is horrible, the state its in now is pre pre alpha!!! Should be free to play at best. Superfighters Deluxe is one of those games that I can almost guarentee I will be playing for several years. If workshop is added and support continues for a long time, this game can be a 2D fighter that is as well known as Garry's Mod.. 7/10

I like this, and I recommend it. There are very clunky moments, and I encountered a number of clipping bugs, but it is challenging, scary and fun. Well worth the money, but be aware that there is only 60 minutes playtime here.. Calling this game a travesty is doing a disservice to travesties everywhere.. So...there is no QUIT GAME button.

Not worth the full price after all. (It could be a good flash website game...or is used to be?). recent patches made the game better, well done bobik and team. buy this game if you want all your memory eaten up cause thats all it does, takes about 5 minutes to just get to the loading screen and an additional 10 minutes to start anything up at all.. A nice relaxing stroll through mazes. Beginning levels start off easy. Later levels are really only hard because you can't see the whole maze layout, so it's hard to map out any real path. Have to keep track of where you've scouted out on.. The girl that shown when I start the game is cute.

Summary of first play

Played the normal diff, died at second boss, Played it again, died at third boss twice. Close the game. Open the game again, played the beginner mode, beat it in one hour.

The positive

- Gamepad supported
- You can customize your ship to fit your playstyle.
- Unlockable skin for your ship.
- Graphic and art is well done.
- The art has unique style.
- · Bosses are so cool.
- <u>Difficulty in beginner \(\) normal mode is challenging, increasing replayability to beat the game better than previous playthrough.</u>

 Neutral

- Story is standard save the world theme. The Negative
 - There is some area where I thought the enemy bullet come at me, but it is just the background.
 - The burst attack lack of feedback, I expect some kind of sound effect when my burst attack (especially the blade one) hit the enemy, but nothing came out.
